

# Package ‘minfiDataEPIC’

October 18, 2017

**Version** 1.2.0

**Title** Example data for the Illumina Methylation EPIC array

**Description**

Data from 3 technical replicates of the cell line GM12878 from the EPIC methylation array.

**Author** Jean-Philippe Fortin, Kasper Daniel Hansen

**Maintainer** Kasper Daniel Hansen <kasperdanielhansen@gmail.com>

**License** Artistic-2.0

**Depends** R (>= 3.3), minfi (>= 1.21.2),  
IlluminaHumanMethylationEPICmanifest,  
IlluminaHumanMethylationEPICanno.ilm10b2.hg19

**LazyData** yes

**biocViews** Homo\_sapiens\_Data, MethylationArrayData, MicroarrayData

**NeedsCompilation** no

## R topics documented:

--------------	----------

---

MsetEPIC	<i>An example dataset for Illumina’s Human Methylation EPIC dataset, after preprocessing.</i>
----------	-----------------------------------------------------------------------------------------------

---

### Description

This contains the raw data for 3 technical replicates of the cell line GM12878 from the Illumina’s Human Methylation EPIC platform. The data has been preprocessed with preprocessRaw.

### Usage

```
data(MsetEPIC)
```

### Format

An object of class “MethylSet”

**Details**

Scripts for creating the object is found in the `scripts` directory of the package and `extdata` contains the IDAT files. The data has been preprocessed using `preprocessRaw`.

**See Also**

[MethylSet](#) for the class definition, [preprocessRaw](#) for the preprocessing function, [RGsetEPIC](#) for the companion raw data.

**Examples**

```
data(MsetEPIC)
pData(MsetEPIC)
```

---

RGsetEPIC

*An example dataset for the Illumina's Human Methylation EPIC platform.*

---

**Description**

This contains the raw data for 3 technical replicates of the cell line GM12878 from the Illumina's Human Methylation EPIC platform.

**Usage**

```
data(RGsetEPIC)
```

**Format**

An object of class "RGChannelSet"

**Details**

Scripts for creating the object is found in the `scripts` directory of the package and `extdata` contains the IDAT files.

**See Also**

[RGChannelSet](#) for the class definition, [MsetEPIC](#) for the companion preprocessed data.

**Examples**

```
data(RGsetEPIC)
pData(RGsetEPIC)
```
